Carbon Reduction Plan

JHWCC25 Ltd, trading as Insight Growth Consultancy. Published 25 November 2026.

Our commitment to net zero

We are committed to reaching net zero emissions by 2050 at the latest. We will reduce our emissions every year towards that goal.

Baseline emissions

Our baseline year is our first trading period, 15 May 2025 to 31 May 2026. We own no vehicles, lease no premises and work from a home office. Almost all our emissions therefore come from business travel.

Scope	Source	Emissions (tCO2e)
Scope 1	No company vehicles, fuel or premises	0.0
Scope 2	No electricity or heat bought for company premises	0.0
Scope 3	Business travel by car, 12,274 miles	3.4
Scope 3	Rail and London transport	Below 0.1
Total		**3.4**

Current emissions

Our baseline year is also our most recent reporting year, so our current emissions are 3.4 tCO2e.

Emissions reduction target

By 31 May 2029, we will cut business travel emissions per pound of turnover by 25% against our baseline. We will report our progress every year in this plan.

Carbon reduction measures in place

- We meet online by default and travel only where being in the room adds value for the client.
- We travel by rail rather than car for journeys outside the East Midlands where a direct service exists.
- We use digital documents and electronic signatures instead of printing and posting.
- We record the mileage of every business journey, so we measure emissions from real data.

These measures will be in place when we deliver any contract awarded through the Demand Management and Renewables DPS.

How we measure

We report emissions under the Greenhouse Gas Protocol Corporate Standard and the Corporate Value Chain (Scope 3) Standard. We apply the UK Government greenhouse gas conversion factors for an average car of unknown fuel type to our recorded business mileage.

Declaration and sign-off

We completed this Carbon Reduction Plan in line with Procurement Policy Note 06/21 and its guidance and reporting standard. We report and record emissions under the Greenhouse Gas Protocol Corporate Standard, using the UK Government conversion factors for company reporting. Our director reviewed and signed off this plan.
